

Marker Events

Overview and tutorial for creating multi-group events in Marker.

•

Getting Started:

If you are not already a Marker user, please refer to the getting started section to create an account and add users. Once this is complete, in addition to creating scorecards, you will be able to create "Events".

This section is designed to help you organize "Events" which are simply competitions between more than one group of golfers.

Navigate to https://app.marker.golf

And tap on the Create Event button. You will be prompted to enter a name for the event, the date, and the course you will be playing. Make your selections and tap the Save button.

Organizing the Event

This will take you to the Event screen where you can add players to the event, create scorecards, add games, and publish the event to all the players.

The first step will be to add players. Tap the "+" button next to the "Players" section. You will have three options:

Once you have selected/added all the players, you'll be prompted to select the default tees that will be played. (Don't worry, you can still add/remove players and change individual tees as desired.)

In our example event we have both men and women playing so you can select the default tees here for each. Once you have selected tap "Save".

Creating Scorecards

Now we move on to creating the scorecards for the event. Scorecards can contain up to five competitors each. In our example we'll have 5 groups of four. Tap the "+" button next to the Scorecards section. You will be prompted to enter a "Tee time" and then select the players that will be part of this group.

Adding games to your event

Once you have all the scorecards completed you can move on to adding games to the event. In our regular weekly group we have Skins, Net Stroke Play, Gross Stroke Play and a Team Stroke Play game. More specifically:

• Skins, 49% Handicap Allowance, Stroke off of low ball, \$20 buy-in.

In the Team Stroke Play setup, you have a few more tasks to complete. First you need to select the number of players in each team (see options above). Then you need to select the specific team members for each team. (you can just select the associated tee time if you want the

playing teams to be the same as the betting teams or, you can pick and choose the betting teams separately here.)

You can also opt to have Marker select the teams for you. Tap "Shuffle Teams" and we'll select teams randomly and do our best to match them evenly.

Next you'll select your aggregates. In our example, we have 3 net balls count on holes 1-8 and 10-17 but have all 4 net balls count on holes 9 and 18. You can select any combination of net and/or gross balls you want each team to count for each hole as you see fit.

Finally you will choose any subtotals you wish to track for the event. The default is just the 18 hole score but you can define additional subtotals as you see fit. Our example tracks subtotals for holes 1-9 (front), 10-18 (back) in addition to the 18 hole total score.

You will get a dialog asking if you are sure as this will send a text message with a link to the scorecard to all the players in the event.

Tap "Yes" to publish all the scorecards - the players will get the following on their mobile device:

Players are now ready to start scoring. We'll show some examples of the scorecards in use as well as some of the leaderboard features in the next section.

Scoring the event

Once players receive their scorecard link they simply tap on it to open their assigned scorecard. Each player in the group will have access to the scorecard and can enter/edit scores. The first thing to notice are the tabs at the top of the screen. There are tabs for each of the games we added when we set up the event. Clicking on each tab will give you a view of the scorecard specific to that game.

The "Trophy" tab takes you to the leaderboard which will give you an event-wide summary of all the games with the added ability to drill in for more detail.

Game Views

First let's have a look at the "Net Skins" view. When we select that tab you get a view of that game with appropriate dots on each hole. If you recall, we chose 49% of course handicap (half rounded down). You can see the total number of strokes each player is getting (next to their initials) along with which holes they are getting them on (dots).

If we move to the "Net Stroke Play" tab, you'll see the view relative to that game where players are getting their full course handicap but are limited to 18 strokes (so no double dots on any hole).

| 6 | 4 | | | | |

Finally we'll look at the "Team Stroke Play" tab. Recall we did not limit strokes on this so we'll see some players with more than one stroke on some holes.

Now we'll start entering scores to demonstrate how Marker deals with all the math for you. Let's enter scores for this group for the first five holes and have another look at the scorecards from the different game views.

A couple of things worth noting first. We have both male and female golfers in this group so as you can see hole 4 is a par 4 for the men but a par 5 for the women. Marker manages all this for you. In our skins game, Karen Knockdown has a skin for her net birdie on the first hole while Hiromi Hybrid and Harry Hazzard have skins on holes 3 and 5 respectively. Marker manages all the strokes and denotes the scores with standard golf marking/graphics. Hiromi's net eagle on hole three has two circles. All the birdies have one circle, bogeys one box and doubles two.

Next we'll look at the "Net Stroke Play view".

Here you can see each player's net scores with a cumulative score in the last completed hole. Harry is -1 through 5, Hiromi is even, Kevin is +2 and Karen is -2. The gross game is just that so we won't go over it here, rather - we'll look at the team game next to see how our group is doing. If you recall, we selected 3 best net balls out of 4 for 1-8 and 10-17).

Looking at our "Team Stoke Play" view we can see at a glance that our team is currently -4 through 5 holes. For each hole, you can see which net balls were selected with the cumulative team score in the "Team" column on each hole.

This provides an overview of the basic views. You can have many other games as well as "side" games with players in other groups. We'll go over that in a later section but now we are going to look at how we are doing in comparison to other groups in the event.

The Leaderboard

Now we'll take a look at the leaderboard. Our example group above was the 08:30 tee time. If we have a look after the other groups have started scoring we'll be able to see exactly where everyone stands based on their last complete hole. First we'll look at the "Skins" leaderboard.

Here we can see the winning score for each hole. In this case we have Allan with a gross 3 on hole 2 and Hiromi with a net 2 on hole 3. It is worth noting that not all players have posted their score for hole 3 (only 16 out of 20 are through) so that skin is not final at this point.

You can also see who cut/tied the scores on each hole by tapping the "X ties" link in the "Result" column.

Finally - we'll look at the "Team Stroke Play" leaderboard. This is where Marker can really play into your team's strategy. You can see where your team stands compared to the others and adjust your team strategy based on where you stand and how many holes are left to play.

Typically, your competitors will already have their accounts connected to their GHIN account but in our example, we have used fictitious users (that don't have GHIN numbers). If you tap on the "Connect your USGA Handicap ID" link, you will be able to enter and save your GHIN number. This will enable automatic handicap index updates anytime you are added to an Event or a Scorecard.

For Events, this can only be done by the user that created the event. For individual scorecards or side games, you can do it on the individual scorecards.

Finally - if your competitors wish to play a different set of tees than those you chose as default, they can change that setting on the individual scorecards here. Once they save, all course handicap information will be updated automatically based on the selected rating/slope for the selected tee set.

Side Games (in Events)

As with standalone scorecards, players can set up their own games. The twist in Events is that you can set up a game with a player (or players) in another group.

If you tap on the gear icon on your scorecard and scroll down to the "Games" section, tap on the "+" to bring up the "Add Game" screen. You can select any game and you'll see a list of all players in the event BUT only those on your scorecard will be selected.

Maybe Kevin and Karen would like to have a Nassau with Raj and Susan. They simply uncheck Harry and Hiromi.

Then select Raj and Susan.

At this point, you can see that Kevin and Karen are 3 up through 8. One other thing worth noting, You can manually press at any point by clicking the score in the Nassau column.

This wraps up the basics for Events. We'll have more detail and example videos for everything we covered in our tutorial section and YouTube channel.
